## **General Basra rules**

### **Players and cards**

A standard 52 card pack is used. As for players, they may be 2, 3 or 4 players. If there are four players, partners sit opposite each other. 4 players can play individually or in partnership.

### **Deal and Play**

The cards are shuffled and the person to the left of the dealer cuts. The dealer may look at the bottom card of the pack after it has been cut.

The dealer then gives the four cards to each player, beginning with his right hand opponent, going around the table anticlockwise, and ending with himself. The next 4 cards are turned face up in the middle of the table. The area where the face up cards are set out is known as the "floor" - maybe the game was originally played on the floor, though nowadays it is normal to play on a table. If the cards on the floor include any jacks or the seven of diamonds, the dealer buries these cards in the undealt pack and replaces them by dealing new cards to the floor from the top of the undealt cards.

The player to dealer's right plays first and the turn to play passes anticlockwise. Each turn consists of playing one card face up to the floor and possibly capturing some of the cards that are there. Captured cards are placed face down in front of the player who captured them. When there are four players, partners keep the cards they have captured together in a single pile. When all players have played their four cards, the dealer gives them each another batch of four from the undealt cards (but no more cards are dealt to the floor) and play continues. When the whole pack has been dealt and the players have played their last four cards the play ends. The hand is scored and the turn to deal passes to the right.

### **Notes :-**

[3] Basra can occur in the beginning or the end of the game.

[4] After the last card has been played, any cards that remain on the floor are taken by the player who last made a capture, but this does not count as a Basra
